

Cut your energy consumption with REM

Responsible Energy Management (REM) can slash 50% off your energy costs with a wide range of energy-efficient green heating systems.

With over 10 years experience in the manufacture of state-of-the-art green technologies, REM supplies, designs and installs comprehensive green heating and hot water systems that will actively reduce heating bills of domestic and commercial properties.

- ✓ Solar thermal generated can be used all year round
- ✓ Drain-back system prevents freezing and over pressurisation
- ✓ Thermal storage tank eliminates risk of legionella
- ✓ Solar Thermal contributes to domestic hot water and heating
- ✓ Fully intergrated with gas, oil, heatpumps and bio-mass
- ✓ All MCS accredited systems

“With the rising price of energy making payback periods quicker than ever, there has never been a better time to invest in REM’s leading green heating and hot water systems.”

“As an energy efficient heating specialist, REM operates with one simple mission – to reduce your carbon footprint. Using the latest ‘green’ technology we can improve your heating system, shrink your CO₂ emissions and cut your energy costs.”
